COURSE OVERVIEW

Augmented Reality (AR) technology is an exciting, progressive technology that influences various industries such as manufacturing and how frontline workers use and learn products and operations within their environments. In this course, you will examine AR as a valuable solution to common business challenges across multiple industries. You will explore how to build AR solutions with PTC's Vuforia Expert Capture software.

TARGET AUDIENCE

Users with minimal experiences with Augmented Reality and Vuforia Studio will benefit from this course.

PREREQUISITES

- None

LEARNING OBJECTIVES

- Summarize AR technology and its capabilities
- Assess AR use cases for industrial settings
- Compare PTC's Vuforia products to each other
- Identify PTC's Vuforia products to AR solutions
- Experiment with AR hardware devices
- Experiment with AR using PTC's Vuforia products
